Engineer crafting high-performance systems with automation — where efficiency meets intelligent design.

Brief

I'm a Backend Engineer who thrives on building lean, high-performance distributed systems. While I can navigate the frontend when needed, my real passion lies deep in system programming and Linux internals. With hands-on experience in Go, Kubernetes, AWS, GCP, and scalable architectures, I focus on crafting resilient, efficient solutions and automating everything possible. Lately, I've been diving into Machine Learning—exploring, using, and even building AI tools that push the limits of intelligent automation.

Skills

Languages Go, Python, JavaScript, Zig, Bash
Frameworks Echo, React, TailwindCSS, Templ (Go)
Databases PostgreSQL, Redis/KeyDB, DynamoDB, Elasticsearch, InfluxDB

Message Brokers Asynq (Go), NATS
Infrastructure Kubernetes, Docker, Pulumi/Terraform, Linux
Observability Grafana, Prometheus, Loki
Cloud Platform AWS, GCP

Experience

Vivasoft Limited Software Engineer	Aug 2022 – Present
<u>Klikit</u> <ul style="list-style-type: none">– Microservice to handle uploading files to GCS, as well as image conversion and resizing.– Microservice to send emails with MailGun.– Microservice to send SMS and WhatsApp messages to users.– Integrate Third-Party Platform to Klikit.– Collaborated with other microservices as necessary.– Tech Stack: Go, MySQL, Docker, Kubernetes, AWS EKS, GCP GCS, MailGun	
<u>Hink</u> <ul style="list-style-type: none">– Refactored the project with Clean Architecture principle.– Fixed bugs.– Deployed a lambda for handling media post-processing.– Tech Stack: Go, MySQL, Elasticsearch, Docker, Kubernetes, AWS S3, GCP GKE, Google Maps API	
<u>Circle</u> <ul style="list-style-type: none">– Refactored DynamoDB table design for better indexing and faster data retrieval as well as reducing read/write costs.– Improved user feed.– Automated place registrations from user pings.– User management features for admin.– Tech Stack: Go, AWS DynamoDB, Docker Swarm, AWS EC2, AWS SES, Google Maps API	
<u>Anonymous Feedback System</u> <ul style="list-style-type: none">– Designed and implemented a secure feedback system with untraceable Google login.– Designed UI and Portal, segregated by user type.– Tech Stack: Go, PostgreSQL, JavaScript (React)	
<u>SIP Server</u> <ul style="list-style-type: none">– Designed and implemented a horizontally scalable SIP Server for Telecommunication System.– Added geo-restrictions, rate limiting.– Added Monitoring and Analytics for calls and server.– Added voice mail and email notification support.– Tech Stack: Asterisk, OpenSIPS, RTPEngine, PostFix Relay, MySQL, PostgreSQL, Kubernetes	
Softimist (Part-time, in weekends) Software Engineer	Sep 2025 – Present
<u>Edushade (Learning Management System)</u> <ul style="list-style-type: none">– Designed and implemented File Manager for LMS.– Designed and implemented billing service with SSLCommerz as the gateway.– Enabled one-time purchase, EMI purchase and susbscription system.– Tech Stack: Go, PostgreSQL, Redis, SSLCommerz	

Education

North South University, BD

Bachelor of Science in Computer Science and Engineering

2021

Publications

- Patch-Wise Semantic Segmentation of Sedimentation from High-Resolution Satellite Images Using Deep Learning — [Springer - 2021](#)
- Effect of Label Noise on Multi-Class Semantic Segmentation: A Case Study on Bangladesh Marine Region — [Taylor & Francis - 2022](#)

Awards

- President's Scout Award (2011)
- IELTS, Band 7.5 (2016)

Projects

HTTPostie (API Testing Tool)

- Creates swagger-like testing tool from ‘.http’ files.
- Creates mock endpoints for frontend.
- *Tech Stack: Go*

Lumos (Personal NotebookLM Clone)

- NotebookLM alternative, on *your* server/notebook.
- *Tech Stack: Python*

Inventory Management & Ledger (*Personal Paid Project*)

Jan 2022

- Desktop App: built with Rust (Tauri), ReactJS, SQLite
- Tracks the product stock.
- Provides a digital ledgerbook for daily money-transaction entries.
